GitHub: github.com/gurramramakrishna23 | LinkedIn: linkedin.com/in/gurram-rama-krishna-678b45375

## PROFESSIONAL SUMMARY

Computer Science undergraduate with a CGPA of 8.5, interested in software development, machine learning, data science, and problem solving. Hands-on experience building practical projects using Python, data analysis, machine learning, computer vision, and Streamlit. Strong interest in learning through development and competitive programming.

## TECHNICAL SKILLS

|                              |                                                                  |
|------------------------------|------------------------------------------------------------------|
| <b>Programming</b>           | C, Python, Java, R                                               |
| <b>Data &amp; Databases</b>  | SQL, MongoDB, Pandas, Microsoft Excel, Microsoft Power BI        |
| <b>Machine Learning</b>      | Scikit-learn, Data Analysis, Data Visualization                  |
| <b>Tools &amp; Libraries</b> | Streamlit, Matplotlib, Seaborn, OpenCV, InsightFace, Git, GitHub |

## EXPERIENCE

**Data Analyst Intern — SWYNEX Technologies** | Remote | Sep 2026 – Oct 2026

- Selected for a 30-day project-based internship in the Data & AI domain.
- Working on structured data analytics assignments involving data cleaning and analysis.
- Developing interactive dashboards using Power BI and other BI tools.
- Applying data visualization and analytical techniques to practical datasets.

## PROJECTS

### Smart Attendance Tracker

*Python, OpenCV, InsightFace, Database Management*

- Built a face-recognition based attendance system to automate student identification and attendance tracking.
- Integrated OpenCV and InsightFace for face detection and recognition with database-backed attendance records.
- Designed the workflow to reduce manual attendance effort and errors.

### Titanic Survival Prediction

*Python, Pandas, Scikit-learn, Joblib, Streamlit, Matplotlib, Seaborn*

- Developed a machine learning web application for predicting Titanic passenger survival probabilities.
- Built an interactive Streamlit interface for entering passenger information and generating predictions.
- Used data preparation, model training, visualization, and model persistence with Joblib.

### Data Entry & Cleaning Dashboard

*Python, Pandas, Streamlit*

- Developed an interactive dashboard for inspecting, cleaning, analyzing, and visualizing uploaded datasets.
- Designed the application around practical data-preparation and analysis workflows.

## COMPETITIVE PROGRAMMING

**CodeChef:** 600+ problems solved | Rating: 1050    **LeetCode:** 30 problems solved

## CERTIFICATIONS

- IBM AI Fundamentals — Dec 2025
- Cisco Python Essentials 1 — Feb 2026
- BCG Data Science Job Simulation — Forage — Aug 2026
- Google/Coursera Stay Ahead of AI Curve — Aug 2026
- 30 Days Power BI Micro Course — SkillCourse — Aug 2026
- Data Analyst 101 — Simplilearn — Aug 2026

## EDUCATION

**Bachelor of Technology — Computer Science** | Kasireddynarayanareddy College of Engineering and Research | CGPA: 8.5 | Expected 2028

**Intermediate — MPC** | Aurora Junior College | CGPA: 9.3

**SSC** | ZPHS Ghattuppal | CGPA: 8.8

## CORE STRENGTHS

Programming & problem solving · Logical thinking · Quick learning · Competitive programming · Continuous skill development

## LANGUAGES

English · Telugu · Hindi

**INTERESTS**

Chess · Singing
